

Why should you invest in SCM?

Investing in a smart supply chain management tool can help your organization to improve margins, as well as manage cost & waste reduction, inventory control, staff satisfaction, quality of service, and patient outcome.

A survey conducted by Sage Growth Partners commissioned by Syft, gathered the answers of 100 leaders in charge of managing their organization's supply chain. The top takeaways from the survey are:

98%

Say supply chain management is a moderate to high priority

97%

Believe supply chain analytics can positively impact costs

87%

Believe it can improve margins more than 1%

86%

Somewhat/Strongly agree SCM can improve care quality

63%

Say there is a clear ROI for supply chain analytics

38% Agree that a single platform with an intuitive dashboard and analytics suite have the most positive impact on an organization's business operations.

How can a smart SCM tool benefit your organization?

The benefits of choosing an effective SCM go beyond inventory and cost control. A comprehensive solution leverages experience, relationships, contracts, and technology to help your organization achieve its financial and operational goals. It optimizes procurement across all facilities and much more.

What type of organizations can benefit from a smart SCM tool?

Hospitals, Surgery Centers, Healthcare Clinics, Clinical Labs, Medical Groups, Nursing Homes, Urgent Cares and many more can benefit from a SCM tool.
